Languages

French (native)

English (professional, B2)

Profile

Full-stack engineer specialised in Ruby on Rails, with tech lead experience managing a team of developers.

I design maintainable applications with SOLID principles, DDD and hexagonal architecture, and I deliver

Senior Full-Stack Software Engineer | Tech Lead

Ruby (Ruby on Rails), JavaScript (Hotwire with Stimulus.js and turbo)
19 years experience with **17 years** in Ruby on Rails
Driving licence (category B)

Work Experience

SENIOR SOFTWARE ENGINEER | **ELCA / EKKIDEN**
(Fribourg - Switzerland, client: Swisscom - Wingo) // August 2025 - Today

SWISSCOM (THOM 3)

«THOM3» is an internal web application giving about 100 agents simplified, dedicated interfaces to the IT tools used by internal and external user groups. It gathers **data sources** *from* **6 systems** *and presents them* **in one place**, *in a unified way.* **Joined a team of 2 developers as AI consultant.**

Tech stack

- Ruby on Rails 8
- jQuery, Next.js, Node.js
- Multi API
- SOAP
- LDAP
- GRAPHQL
- PostgreSQL, Sqlite, Mysql
- Open Telemetry

Key contributions

- Raised productivity by 40% by introducing AI processes (notably Spec Kit)
- Built customer, contract, billing and invoice features
- Integrated 6 systems (SOAP, LDAP, GraphQL)
- Delivered orders, shipping and promotions
- Added IP pool and SIP account management
- Covered tasks, events and documents

TECH LEAD ENGINEER (FULL REMOTE) | **STOCKOSS**
(Paris - France) // May 2021 - August 2025

STOCKOSS (SMS)

«SMS» is a logistics platform managing inbound and outbound flows, open to third parties through a standard API. As tech lead, I manage projects and developers using agile methods.
Tech lead position with 4 developers, project management, team management.

Tech stack

- Ruby on Rails 6.1 to 7.x
- ActiveJob + Sidekiq
- Active Storage (AWS S3)
- Action Cable + Redis, SASS
- Ui Bibz, Stimulus.js
- PostgreSQL, Capistrano
- Docker, Traefik
- Claude Code (AI-assisted development)

Key contributions

- Led a team of 4 developers, all retained (agile methods)
- Built the standard API and the iOS app connection
- Integrated the TMS and QR code management
- Developed warehouse, order and item management (about 100 flows per day)
- Set up the Docker infrastructure from scratch, 1-minute deployments, 80% test coverage
- Applied Domain Driven Design (DDD)

SOFTWARE ENGINEER (FULL REMOTE) | **GENERAL ELECTRIC HEALTHCARE**
(Melbourne - Australia) // February 2020 - March 2021

GENERAL ELECTRIC HEALTHCARE (ADMIN CHRONICLE)

«ADMIN CHRONICLE» manages every «Chronicle» instance: an admin user manages all devices, data and users from any instance. **Team of 6 developers.**

Tech stack

- Ruby on Rails 5.2
- ActiveJob + Sidekiq
- CarrierWave
- Action Cable + Redis, SASS
- jQuery, Octopus
- PostgreSQL, Docker
- Kubernetes infrastructure

Key contributions

- Built user, device and organisation management
- Managed PostgreSQL databases per instance
- Managed 5 Chronicle instances plus on-premise ones on Kubernetes

products end to end, from infrastructure to user interface.

Languages and frameworks

Ruby, Ruby on Rails
JavaScript, Hotwire (Stimulus.js, Turbo)
HTML/CSS
Rust
NestJS, Next.js (Nodejs)

Data and infrastructure

PostgreSQL
Redis, Sidekiq
Docker, Kubernetes
Kamal, CI/CD
AWS (S3)

Practices

SOLID, Design Patterns
Hexagonal Architecture, DDD
Composition over Inheritance
TDD, unit tests
Agile methods

Tools and environments

Neovim, Git
Claude Code
Linux, macOS

Education

2015 - Bureau Véritas, Moirans, Isère, FRANCE
Engineer degree by validation of experience (VAE)

2007 - Nancy-Metz University, Verdun, Lorraine, FRANCE
DUT Services et Réseaux de Communication (Advanced Diploma)

2003 - Vauban High School, Verdun, Lorraine, FRANCE
Baccalauréat STI Génie Électrique (Senior Secondary Certificate)

SOFTWARE ENGINEER | **GENERAL ELECTRIC HEALTHCARE**
(Eysins - Switzerland) // September 2019 - February 2020

GENERAL ELECTRIC HEALTHCARE (CHRONICLE)

«CHRONICLE» software supports cell therapy manufacturing in a unified digital space with real-time process data, supply chain tracking, electronic batch records and standard operating procedures, automated system alerts, and more! **Main position and connection point between Eysins' hardware team (Switzerland) and Cambridge's software team (England). Team of 30 developers.**

Tech stack

- Ruby on Rails 5.2
- ActiveJob + Sidekiq
- ActiveStorage
- Action Cable + Redis, SASS
- jQuery, React
- PostgreSQL, Docker
- Kubernetes, Unit Tests

Key contributions

- Connected medical devices to the platform through API
- Imported and exported device data
- Built real time facilities and alerts management
- Added real time tracking with Google Maps
- Generated cell therapy procedures for about 250 clients (5 to 10 devices each)
- Implemented SSO and user management

SOFTWARE ENGINEER | **BUREAU VERITAS CODDE**
(Grenoble - France) // October 2011 - September 2019

BUREAU VERITAS (EIME V5 / V6, 2011 - 2016)

SaaS computing environmental impacts, life cycle analysis and eco-design. Sole developer, 20 instances and more than 300 clients. Once the model of life phases is built, impacts are visualised through data tables and graphics. v5 view layer is fully generated in JavaScript by ExtJS.

Tech stack

- Ruby on Rails 3.1 to 5.0
- ActiveJob + Sidekiq
- Action Cable + Redis, Chart.js
- HAML, SASS, Ui Bibz
- CoffeeScript, ExtJS, Stimulus.js
- PostgreSQL, Docker (v6)

Features

- Database inheritance in PostgreSQL
- File browser with tree modeling
- Multi copy/cut/paste, drag and drop
- Real time notifications
- Results as tables and graphics
- Import/export Excel and PDF

BUREAU VERITAS (EDC, 2015)

Data collection platform between manufacturers and suppliers, to identify hazardous substances in a product, compliant with RoHS, REACH and IEC 62474.

Tech stack

- Ruby on Rails 4.2
- HAML, SASS, Ui Bibz
- CoffeeScript, jQuery
- PostgreSQL, Docker
- Unit tests

Features

- PostgreSQL views
- Chat between manufacturers and suppliers
- Product tree visualisation
- Request states and rights management
- Dashboard with calendar

OTHER PROJECTS

Sinra *(2026, side project): SaaS project management combining V-model rigor and Agile, organised around releases, sinra.dev.* **Tornade** *(2026, side project): lossless music player, native macOS app and open source Rust TUI, tornade.tf.* **MPEL** *(2015): product rating platform with dynamic forms, basis of my engineer degree by VAE.* **Ui Bibz** *(2015, open source, 296,808 downloads): UI component library.* **Fathome** *(2015): real estate ad scraper with itinerary filters.* **Oscar** *(2013): sales request and status workflow.*

EARLIER EXPERIENCE
// 2007 - 2011

PHP AND DRUPAL DEVELOPER | ***VISUAL-LINK*** *(Valence, March - September 2011): two showcase websites, REST web service for an iOS app.*

FREELANCE COMPANY CREATION | ***H&J*** *(Morocco - France, January 2009 - March 2011): Rails 2.3 and CakePHP websites, Linux servers, customers.*

MULTIMEDIA DESIGNER | ***MLM COMMUNICATION AGENCY*** *(Metz, September 2007 - December 2008): PHP e-commerce site, showcase websites, Flash banners.*
